CUSTOM SOLUTIONS, INC. ANNOUNCES NEW HOMEVISION

INTERNET WEB SERVER

Custom Solutions, Inc. announced today the immediate availability HomeVision version 3.0. This version adds numerous features to the HomeVision controller, including a web server. The web server allows HomeVision to be controlled from any web browser anywhere in the world.

The new web server software runs on a PC connected to the HomeVision controller. This provides several capabilities:

- Turns your computer into a web server that serves files to web browsers.
- Can be accessed by any web browser. The browser can be on the same PC as HomeVision, on another PC on a network within your home, or anywhere in the world (if you have an Internet connection to your home PC).
- Can automatically create web pages showing HomeVision status. Over a dozen pages are built-in to control the many HomeVision objects, including:
    - Thermostats
    - X-10 devices
    - Input ports
    - Output ports
    - Infrared signals
    - Analog inputs
    - Scheduled events
    - Periodic events
    - Flags
    - Variables
    - Timers
    - Event log
    - Schedule download
- Can insert HomeVision status and control objects into custom web pages you create. Users can create as many custom pages they want.

About HomeVision:

HomeVision has been one of the most widely acclaimed home automation control systems since it's debut at Habitech '96. HomeVision provides many features:

- Two-way X-10 (all 256 addresses)
- Two-way learning infrared (255 signals)
- 24 I/O ports (expandable)
- Video output screens displayed on the TV

- Real-time clock
- "Stand-alone" capability
- Add-on capabilities such as:
  - Serial ports
  - Analog inputs
  - Digital temperature sensors
  - Telephone control
